Make Tool Setup a snap with our Digitec Tool Measuring Setup System. Streamlining and optimizing production calls for creating an efficient operational sequence. That includes highly accurate tool measurement and set up in order to maintain consistent machining results. Accuracy is paramount! When firmly secured to the workbench, the Digitec Measuring System offers a safe, effective and economical way to verify dimensions and prepare the tooling to be right on the first pass. Eliminate costly tool setup, mistakes and material waste.

Optional Torque wrench and collet key, when purchased with the Digitec provides savings!
