## **Timing/Results**

### **Is the Publix Atlanta Marathon, Half Marathon & 5K a timed event?**

Yes, the Publix Atlanta Marathon, Half Marathon & 5K is a timed event. The ChronoTrack B-Tag affixed to the back of your bib is your timing device for this event. This is a single use bib tag. The lightweight timing tag stays attached to the back of the race bib and must not be removed. The timing tag precisely records each runner's gun time and chip time. Participants MUST cross the start line during the official start time. Participants who begin before the official start or cross after the start timing mats have been removed will not receive an official time. Your bib MUST be clearly visible and worn on the front and outside of all clothing during the entire race. Do not cover your bib with any layers, including a fuel belt. Do not alter, fold or wrinkle the bib in any way. Participants with missing or irregular split times at official timing checkpoints will be reviewed and may be disqualified.

### **When will race results be posted?**

Unofficial race results will be posted at [atlantatrackclub.org](http://atlantatrackclub.org) by the afternoon of Sunday, March 17. Results inquiries will be accepted up to 2 weeks after the event at which time they will be made official. For questions about your results, email [results@atlantatrackclub.org](mailto:results@atlantatrackclub.org) and include your name, bib number, and start wave.

### **Why do my results show two different times? What is chip time vs. gun time?**

Chip time is the actual amount of time it takes a runner to go from the start timing mats of a race to the finish timing mats. Chip time is recorded using the ChronoTrack B-tag affixed to the back of your bib. This is why it is important you wear your bib correctly. Gun time is the amount of time it takes a runner to finish the race from the moment the gun (or horn) went off.

### **Why do the official results show me running slower than the time I recorded on my watch?**

The quality of different GPS units can vary, but all of them can be affected by conditions such as buildings or large crowds which can interfere with reception of satellite signals and cause them to be inaccurate. The chip time is your official time.

### **Are there age group awards?**

Age group awards for the top three men and women in each age group (14 & under, five-year increments up to 80+) are mailed to participants after results are finalized two weeks following the event.

### **Why are overall standings based off gun time while age group standings are based off chip time?**

As a USATF sanctioned event, Atlanta Track Club follows their guidelines in determining standings within the different divisions. Our overall categories include open male and female, masters male and female, and grandmasters male and female. Per USATF policy, overall standings are ranked off of gun time, the order in which participants crossed the finish line. Age group standings are ranked by chip time. If you look at your individual ChronoTrack results you are able to see both gun and chip time. If you sort it by the different divisions, you will see your time listed based off how that category is ranked.
