

NATIONAL FINDINGS ON HEALTH CENTERS' RESPONSE TO COVID-19

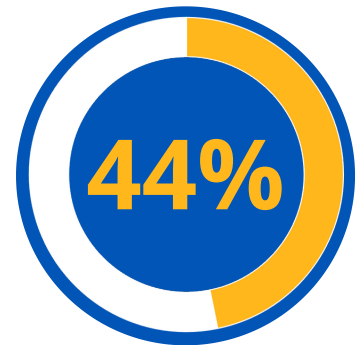

As of April 20, 2020

The Health Resources and Services Administration (HRSA) is surveying health centers weekly to track their COVID-19 response and patient and staff impacts. These findings illustrate a point-in-time snapshot of an unprecedented and evolving situation.

Health Centers are Rapidly Adapting to Meet Testing Needs in Their Communities

have the ability to test

have walk-up or drive-up testing

56,440

Tests conducted in the last week

9,292

Patients tested positive

1,381

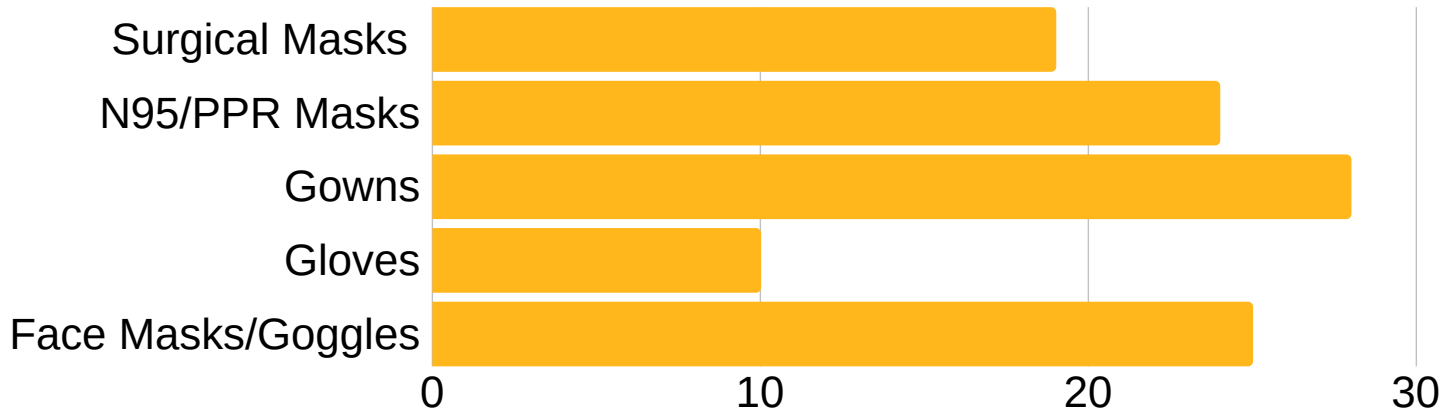

Staff tested positive

52% of visits last week occurred virtually

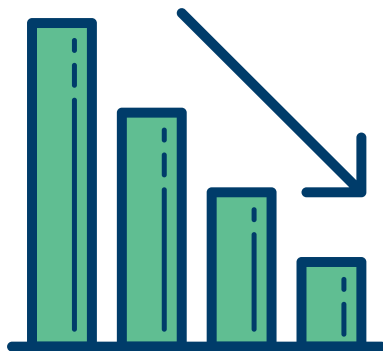

Health Centers Continue to Lack Essential Personal Protective Equipment (PPE)

% of Health Centers that may run out of personal protective equipment (PPE) items after next week

COVID-19 Crisis Results in Extreme Challenges to Health Center Operations, Staffing, and Budgets

Health center weekly visits are down by about half¹

14% of health center staff are unable to report to work due to COVID-19²

2,073 health center sites temporarily closed due to COVID-19

Source: Data presented in this fact sheet come from the Bureau of Primary Health Care, Health Resources and Services Administration, Health Center COVID-19 Data Collection Survey administered on April 10, 2020. 1,154 (83%) of federally-funded health centers responded. For more information, please visit <https://bphc.hrsa.gov/emergency-response/coronavirus-healthcenter-data>.

1. Visits refers to all visits regardless of service type (e.g. medical, dental, behavioral health, etc.), including virtual visits; visits are at 47% of average of weekly visits pre-COVID-19.

2. Due to staff exposure, school closure, site/service closure, and other reasons.
