

Variety:

GAX-1

Description:

GaX 01 is the result of the only selections done on hemp plants in the state of Georgia. Tested in three growing locations throughout the state by UGA, this plant performed well in all locations. Was not as strong as 07, but there is value for farmers who want to plant multiple varieties because of limited testing in the state.

Why GaX 01

- Stability to harvest
- Consistency of the crop.
- Easy to grow
- Low THC
- Yield
- Tested in Georgia
- Increase planting diversity

CBD Ratio ~24:1

Plant Architecture Bushing

Planting Date May 15th-July 25th

Harvest Date September 15th - October 30th
Depends enterily upon THC testing results

Flower Date August 1st-August 20th

Plants/Acre 1800-2600

Soil PH 5.5-6.5

Planting Recommendation

1800-2600 Depends on planting date, later the planting date the higher the planting density

Irrigate as needed but do not let roots sit in water

Monitor crop for pests
