

Variety:

GAX-7

Description:

GaX 07 is the result of the only selections done on hemp plants in the state of Georgia. Tested in three growing locations throughout the state by UGA, this plant performed well in all locations. This is the best tested plant in the state, but it still has limited testing and results may vary from 2019 season.

CBD Ratio

~24:1

Plant Architecture

Bushing

Planting Date

May 15th-Aug 1st

Harvest Date

September 15th -  
October 30th Depends  
entirely upon THC  
testing results

Plants/Acre

1800-2600 Depends on  
planting date

Soil PH

5.5-6.5

Why GaX 07

Stability to harvest  
Consistency of the crop.
