Guardian Centers' COVID-19 "Safety Bubble" Protocol

The world has changed; we have adapted!

The COVID-19 pandemic has challenged all elements of the U.S. to maintain readiness in a complex and uncertain environment. Guardian Centers remains open and has continued with operations throughout the pandemic. Leveraging Guardian Centers' expertise, we continue to monitor and evaluate recommended safety measures and have instituted a campus "safety bubble" by establishing strict protocols that align with the World Health Organization (WHO), Center for Disease Control (CDC), and the Georgia Dept. of Public Health (DPH).

Guardian Centers has exceeded safety standards and protocols by:

- Established a "Single point-of-entry/exit"
- Emergency Medical Technician (EMT) at the "single point-of-entry/exit" for continuous medical screening
- Enhanced disinfecting/cleaning processes throughout facilities
- Required social distancing standards and markers in all facilities
- Masks required to be worn in all student and social areas
- Established quarantine process and area for immediate action and response.

See other side for more details.

COVID-19 PROTOCOLS FOR GUARDIAN CENTERS

ACTIVITY	PROTOCOL	STUDENTS	GUESTS
Departing for Guardian Centers	With the incubation period for COVID-19 being 2-14 days, prior to departing the student's home of record (HOR), a pre-screening checklist must be completed by each student and reviewed by the appropriate medical authority.	●	
Flying to Atlanta, Georgia	Practice social distancing, wear a mask and practice good hygiene, including frequent handwashing with soap and water or hand sanitizer, during travel to Guardian Centers.	●	●
Arrival at Hartsfield-Jackson Atlanta International Airport (ATL)	A location at the Hartsfield-Jackson Atlanta International Airport has been identified to conduct rapid testing by the Guardian Centers' Emergency Medical Technician (EMT). Students that test positive will not be authorized to proceed to Guardian Centers' campus, and the student's organization will be responsible for coordinating transportation back to the student's HOR.	●	
Charter Bus to Guardian Centers' Campus	In accordance with CDC's social distancing recommendations, no one is to be within two rows of the bus driver. If for any reason the bus stops between Atlanta and Guardian Centers' campus, the only person authorized to depart the bus is the driver. The bus is disinfected after every trip per TranSouth Motorcoach* cleaning protocols.	●	
Upon Arrival at Guardian Centers' Campus	Once on Guardian Centers' grounds, students are not permitted to leave the campus for the duration of the training.	●	
Access Control	Guardian Centers has established a "single point-of-entry/exit" manned by an EMT. All (non-student) guests entering the campus must answer a screening checklist and have their temperature checked. Anyone with an elevated temperature will not be authorized to enter the campus.	●	●
Daily Temperature Checks	At the beginning and end of each day, students and instructors will have their temperature taken and logged by the Director of Training or the Training Manager. Any temperature over 100 is a requirement to be reported to Guardian Centers.	●	
Personal Protective Equipment (PPE)	Training staff, students, and authorized guests will wear a mask when in movement areas (hallways or public space), in billeting areas, and in the dining facility. (PPE in classrooms/training grounds will be at the discretion of the training instructor).	●	●
Training on Campus	While training at Guardian Centers, students and other client personnel shall have minimal physical interaction with Guardian Centers' personnel. Staff that are authorized to interact with students will follow strict PPE procedures to ensure that staff and students are protected.	●	
Dining on Campus	PPE should be worn in the dining facility while in line to be served. Only one person is permitted to sit at each table. Once seated, mask can be removed.	●	●
Billeting on Campus	To limit possible exposure while on the Guardian Centers' campus, it is recommended that instructors limit public interactions as much as possible. If feasible, instructors should billet on-site during the training period. Billeting on the campus will follow a layout in accordance with CDC-established guidelines that adhere to social distancing protocols.	●	
Quarantined Zone on Campus	In the case that an individual tests positive for COVID-19, they will be quarantined or self-isolated for a period of 14 days, in accordance with CDC guidelines and Guardian Centers' protocols. Guardian Centers has designated a quarantine space/location, where only authorized medical personnel will be permitted to enter. Any personnel that had interactions with the individual will also be quarantined or self-isolated for a period of 14 days. In addition to a laptop computer and quarantine kit, they will be given a radio to communicate if their symptoms are getting worse. Upon the end of the isolation/quarantine period and upon a negative test result for COVID-19, person(s) shall be released from quarantine or self-isolation.	●
