

HOW TO MAKE A FLEECE BLANKET

1

GATHER YOUR SUPPLIES

To create a fleece blanket gift you will need 2 yards of fleece per side (4 yards in total), fabric scissors, a pen and a yardstick. Masking tape is optional.

2

TRIM THE EXCESS

The fabric often has jagged edges. Stack both sections of fleece on top of each other with the correct side facing out. To make the edges nice and neat, use the yardstick to make a straight line then trim the extra fabric.

3

CUT OUT THE CORNERS

To make sure your blanket corners avoid bunching, cut out a 4x4 inch square in each corner of the blanket. Measure four inches from each side of each corner. Make a small mark with a pen and cut the square out.

4

CUT OUT THE FRINGE

Use your yardstick to carefully measure your fringe before you cut. Each strip should be 1 in. wide and 4 in. long. (You can also use masking tape to help keep each strip consistent in length.)

5

FINISH YOUR BLANKET

Make a small slit (1/3") on the fringe near the base of the blanket. Be sure to cut through both layers. Take the bottom layer and put it through the slit on the top piece. Then take the top piece and put it through the slit on the bottom piece. Complete on all four sides.
