

Mobile App Update

The CVCU Mobile App recently received an update. Users who have already downloaded the CVCU app from the iTunes App Store and/or Google Play Store will see an update to the app available when visiting the App Store or Play Store, or the app will automatically update, depending on the user's device settings. As a result of the update, users may need to login manually with their credentials to set the fingerprint and/or face ID sign in preference again. Users can check to see if they have the latest version available by logging into the app and choosing the "About" tab. The version will be listed underneath "Coosa Valley Credit Union". Version 4.47 is the latest version.

Should you have any questions or concerns regarding this update, please email onlinebanking@mycvcu.org
