Cybercriminals Confess: The Top 5 Tricks, They Use To Hack Your Computer Network

The contemporary world is rife with digital thieves. They're penetrating the complicated data structures of huge credit-monitoring companies like Equifax, and scooping up the personal information of millions of people. They're also targeting small businesses exactly like your own and extorting them for thousands and thousands of dollars. When running a company, it's vital to have a dedicated security team, equipped with the most up-to-the-minute security technology, on your side to protect you from these malicious cyberthreats. But it's not enough to leave it to somebody else. You also need to be informed. Here are five of the most common ways hackers infiltrate your network: [To Continue Reading Click HERE](#)

SHINY NEW GADGET OF THE MONTH:

E-mail Signature Rescue

The business world runs on e-mail. According to LifeWire, around 269 billion e-mails are sent around the world each and every day. But for every e-mail sent, millions go unread, and those that do are often found wanting. How, in the midst of all that noise, can you possibly get your own work e-mails to stand out?

Enter E-mail Signature Rescue (emailsignaturerescue.com), a business dedicated to creating custom, professional e-mail signature templates for all kinds of companies and teams. Using their proprietary software, it's easy to build a robust and beautiful HTML e-mail signature template that will make your e-mails pop. Signatures may seem small, but they can go a long way toward convincing a recipient that you mean business.

Become A Better Public Speaker With This App

Americans are terrified of public speaking. In fact, in most surveys about our fears, talking in front of a crowd far outranks even our fear of dying. But if you, like millions of others, break out in a cold sweat when you imagine giving a speech, you're in luck. There's an app for that.

Developed during the Disrupt San Francisco Hackathon, Vocalytics is a comprehensive project dedicated to building an AI that will teach you to be a better public speaker. The ultimate goal is to develop a virtual trainer that can give feedback even better than what you'd get from a professional speaking coach.

The app – called Orai – uses machine learning to analyze your body language as you speak, ensuring that every word hits home. When paired with speech analysis project SpeechCoach.ai, you can take concrete steps toward killing it in front of any crowd.

Top Tech Accessories To Make Your Life Easier

The best gadgets help us navigate our lives with ease, making particular processes that much more hassle-free. With technology, it's often the little things that make all the difference in the world. Take AUKEY's car phone mount, for instance. At only \$7.99 on Amazon, there's no reason you should be fumbling with your iPhone while you're using Google Maps on a road trip. The clip attaches directly to any air vent, putting your phone front and center for easy viewing and reducing the need for dangerous fiddling.

Or, pair an Amazon Echo with the Tp-Link Smart Plug Mini (\$29.99), which allows you to activate all kinds of devices with your voice or your phone. It's the perfect first step toward a smarter home and a world of convenience.

If you've got a phone that's always dying, hook it up to an Anker battery case, which can extend the battery life of most phones by as much as 120%.!

The Grand Prize Winner of last month's Trivia Challenge is

Al Ebron!

Now, here's this month's trivia question!

Who Wants To Win A \$25 Amazon Gift Card?

You are finally done fiddling around with the computer and it is time to shut it down. Which is one reason you should go to start and hit shut down rather than just turn the computer off by flipping the switch?

- A) There is no reason to go visit start. It is perfectly safe to just flip the switch.
- B) Flipping the switch could cause your computer to explode.
- C) By just turning the switch, you risk losing anything you worked on, even if you saved it to the hard drive.
- D) Because your computer sometimes installs updates when you shut it down properly.
